

DSRMP Series Volume Control Units Configurable 1-8 Zones

The industry's largest supplier of design-build soundmasking solutions

tech spec _ sheet

FEATURES

- Custom configured to meet job criterion, from one to eight volume control modules for individual channel attenuation
- Eleven-stage detent attenuation control (from 0 to 10) in 1.5 dBA increments
- Complete solid-state technology offers clean signal control with no perceived added noise or distortion
- Standard 19" rack mount face plate, available in 2U rack space height (3.5")
- Labeling strip allows for easy identification of each channel volume control

Dynasound will custom configure to job requirements the RMP series volume control units for a clean and organized solution for controlling the attenuation of various soundmasking zones.

The units conform to 19" rack mount face plate, consuming 2 rack units of height. It features a clear vinyl labeling strip that allows the insertion of channel identification labels that can be printed using a downloadable MSWord format template.

All volume control modules are ordered individually and installed in the rack face plate. Unused face plate openings are filled with blank black button or a matching blank plate.

ORDERING INFORMATION

model	description	dimensions	weight
DSVC-1	Volume control unit w/ 1.5 dBA increments	1.75" w X 3.25" h	1 lbs.
DSRMP-(1-8)*	Rack unit configured with as many as eight DSVC-1	19" w X 3.5" h	varies

*

* Note: When DSRMP is ordered with a suffix of "1" through "8", the unit will come configured from the factory with that number of DS100VC volume controls already installed in the rack panel (i.e., DSRMP-7 signifies a DSRMP rack panel with seven DSVC-1 volume controls preinstalled). Price and weight will vary based on configuration.
